TEACHING: STUDENT FEEDBACK

Undergraduate:

“Thank you for being an excellent professor who is passionate about both teaching and engaging students. I found your class enjoyable, engaging, intellectually stimulating and overall very fun. You are one of the best professors I have had during my 3 years of undergraduate studies.”

“He was one of the best professors I have had ... He presents all of the material very clearly and there is no question he finds stupid. Very helpful teacher who really looks out for his students' best interest.”

“Dr. Klonsky is one of the best professors I have ever had. His lectures are interesting and engaging and he truly cares about his students and their progress.”

“Dr. Klonsky is great. His explanations are easy to understand and he speaks really clearly. He is also very helpful.”

“Fantastic professor, very clear, and genuinely concerned for the learning and interest of his students.”

“He was always willing to give feedback and answer any questions without making me feel stupid. After awhile I could feel my own confidence rising and the stress level decreasing because I knew that there was always someone there to help because they wanted to.”

“He made a class of 200 feel like a class of 20.”

Graduate:

“I think you have walked further along the road of graduate pedagogy than most of your companions, many of whom stopped somewhere along the way to rest and never got back up again.”

“I really appreciate the instructor soliciting students’ feedback regularly throughout the course, and then actually incorporating this feedback into the classes ... I really enjoyed the course. I’d recommend it to other students because I found it interesting, enjoyable, and useful.”
